ETISOFT MES
etiSZOP
PRODUCTION OPERATIONS AND LOGISTICS MANAGEMENT SYSTEM
BENEFITS

- Automated verification of production components based on the production plan, BOM and availability of production lines and cells
- Registration and preview of product history (traceability)
- Controlling the allocation of components to the workstation
- Ensuring continuity of supply of components, optimization of storage buffers
- Visualization of production, intralogistics and warehouse processes
- Automatic management of production orders
- Control of the production line and autonomous intralogistic transport systems (AGV, AMR, roller blinds)
KEY FEATURES

• We are both the producer and integrator of the solution
• A thoughtful and intuitive user interface with the possibility of its easy modification
• Flexible software licensing system
• Preparation of our solution for cooperation with video surveillance systems, intralogistic transport systems, printing, applying and reading labels (these are also our own products)
